

Dear Eckstein Family,

Even as teens, children care about what parents say. In middle school, teenagers gain independence. Their bodies are growing. Sometimes they seem so grown up. Yet what you say matters. What you say can make a difference.

A community group called Prevention Works In Seattle (Prevention WINS) is working to stop underage drinking and drug use. We want to help parents help their children to make healthy and safe choices.

This school year, we will be sending positive parenting tips to Eckstein families. These tips are one way to support your child's healthy development during the teen years. What you say to your child can help them make safe choices.

Support at School

Seattle Children's Hospital, in partnership with Eckstein Middle School and Seattle Public Schools, provides complete, school-based support for Eckstein students and families who may be facing drug and alcohol problems.
